

85 Series Casters

RWM's 85 Series caster features the patented Kingpinless™ design. This is the design that RWM patented, and that has proven itself to be the best solution for demanding applications. This is the caster design that all others are now copying because it is simply unmatched in extending service life, reducing all possible causes for caster failure. The 85 Series offers a capacity up to 10,000 pounds and is available with wheels up to 5" wide for higher capacity ratings. This caster is built to take the punishment experienced in high shock and impact loads.

RWM's Patented Offset Raceway - Why It's a Superior Design

Our patented offset precision-machined raceway exerts radial force evenly where there is full contact between the ball bearing and the raceway. RWM's unique design adds more mass at key points. This, plus more thorough heat treatment, provides additional strength and combats brinelling into the core material. The result: No direct "hammering" forces on the intersections of the raceways. Vastly reduced raceway wear. Elimination of the "pull apart" forces of stress in the swivel section. Smoother swiveling action. High maneuverability. Longer service life. Less maintenance. Extra impact resistance. High radial force absorption.
